

Product Specification Sheet

Custom Welcome Home Yard Signs

Custom Welcome Home Yard Signs print on 4mm corrugated plastic. It's a rigid, waterproof sheet, lightweight enough to carry in one hand and sturdy enough to hold upright in moderate wind with an H-stake. Every sign ships ready to stake, so there's no assembly beyond pushing the stake into the ground.

Material

4mm corrugated plastic with wire H-stake included.

Holds its shape outdoors for 3 to 6 months. For a 1 to 3 day welcome home display, it stays sharp through the full event.

Print Method

Direct UV print bonds ink to the sign surface and cures it instantly under UV light.

The finish resists scratching and won't peel or bubble in outdoor conditions.

Color Output

CMYK full-color (cyan, magenta, yellow, and black combined to reproduce any color in your design).

Photos, gradients, and bold text all print accurately in a single pass.

Finishing

H-stakes standard. Grommets (metal-rimmed holes punched into the sign edge) available on request.

Grommets let you hang the sign from a fence or rope instead of staking it.

Size Range

Custom sizes available. Signs wider than 48 in have horizontal flutes running left to right across the face.

Vertical flutes run top to bottom on signs up to 48 in wide, maintaining rigidity at standard yard-sign widths.

Indoor/Outdoor Rating

3 to 6 months continuous outdoor exposure before UV fading or edge wear becomes visible.

Stored flat indoors between uses, the same sign typically lasts through multiple short-term deployments.

Single/Double-Sided

Both options available on every order.

Double-sided prints both faces so the sign reads clearly from both traffic directions.

Flute Direction

Vertical on signs up to 48 in wide. Horizontal on signs over 48 in wide.

Horizontal flutes maintain rigidity across wider widths where vertical flutes would flex.
