

Product Specification Sheet

Custom Yard Sale Signs

Custom Yard Sale Signs print on 4mm corrugated plastic (also called Coroplast), a rigid, fluted plastic sheet with hollow channels that give the sign stiffness without adding weight. Direct UV ink cures instantly on the surface for a tough, scratch-resistant finish. These signs are built for short-term outdoor deployment: one day to several months, depending on how you store and reuse them.

Material

4mm corrugated plastic (Coroplast).

Rigid, waterproof, and lightweight. Holds up through rain, sprinklers, and moderate wind without warping.

Print Method

Direct UV print.

Ink bonds to the surface and cures instantly, producing a smooth, scratch-resistant finish that handles direct sun.

Color Output

CMYK full-color.

Four ink layers (cyan, magenta, yellow, black) reproduce any color in your design, including photos and bold text.

Finishing

H-stakes or grommets.

H-stakes are standard for ground-level yard sale deployment. Grommets suit fence or post zip-tie mounting.

Size Range

12x18 in to 18x24 in standard. Custom sizes available up to 4 ft wide.

Signs wider than 48 in shift to horizontal flute orientation, which affects H-stake fit.

Indoor/Outdoor Rating

3 to 6 months continuous outdoor exposure. Reusable across multiple sale cycles with flat, dry storage between uses.

Single/Double-Sided

Both available.

Double-sided suits 4-way intersections where drivers approach from opposite directions.

Flute Orientation

Vertical on signs under 48 in wide (standard for H-stake mounting). Horizontal on signs over 48 in wide.
