

Product Specification Sheet

Fitted 3-Sided Table Covers With Open Back

Fitted 3-Sided Table Covers With Open Back are tailored 600D PU polyester covers built for staffed trade show and corporate event tables. Sewn corners and contoured panels hug the front and both sides of a 4 ft, 6 ft, or 8 ft folding table, leaving the back open for staff access. Here's the thing: the fit is what separates this from a standard drape cover.

Material

600D PU polyester.

The 600D denier (thread thickness) rating makes this fabric heavy-duty and wrinkle-resistant. The PU (polyurethane) coating adds water resistance that lighter polyester fabrics don't have.

Print Method

Dye sublimation at 300 DPI.

Ink bonds into the fibers rather than coating the surface, so graphics can't crack, peel, or wash off.

Color Output

Full color across the front panel and both side panels.

Any color in your logo prints accurately because dye sublimation isn't limited to a fixed ink set.

Finishing

Sewn corners, contoured panels, hemmed edges.

The tailored construction holds the cover against the table shape so panels don't shift or bunch mid-event.

Size Range

Available for 4 ft, 6 ft, and 8 ft standard folding tables. Round tables also available.

Each cover is cut to fit one specific table size, so measure your table before ordering.

Indoor/Outdoor Rating

Suited for indoor use and light outdoor use in dry or lightly shaded conditions. Colors rated for 50 or more washes without noticeable fading.

Coverage

3-sided with open back. Front and both side panels are covered and printed. The back stays open for under-table access.

Weight

Roughly 2 to 4 lbs depending on table size.

Light enough to fold flat and carry in a tote bag between events.
