

Product Specification Sheet

Fitted 4-Sided Table Covers

Fitted 4-Sided Table Covers are tailored covers in 600D PU polyester with sewn corners and contoured panels that enclose all four sides of a standard folding table. Full-color dye sublimation printing runs at 300 DPI directly into the fabric fibers. Best for corporate events, trade show booths, and client-facing presentations where a structured table appearance matters.

Material

600D PU Polyester.

Denier (a measure of thread thickness) runs at 600D, roughly equivalent to luggage-grade fabric, with a polyurethane coating that resists moisture and adds durability.

Print Method

Dye sublimation at 300 DPI.

Ink bonds permanently into the polyester fibers under heat, so the print will not crack, peel, or sit on the surface.

Color Output

Full color across all panels.

Gradients, photos, and multi-color logos all reproduce accurately on the front, sides, back, and top panels.

Finishing

Hemmed edges and sewn fitted corners.

Each corner is cut and sewn to follow the table's rectangular shape, holding position without clips or adjustments.

Size Range

4 ft, 6 ft, and 8 ft standard folding tables.

Measure your table before ordering. A 6 ft cover on a 6.5 ft table will pull too tight at the corners.

Indoor/Outdoor Rating

Indoor and light outdoor use. Colors rated for 50 or more washes without noticeable fading.

Holds up in covered outdoor settings. Avoid prolonged direct rain exposure without shelter.

Coverage

4-sided fully enclosed.

All four sides covered, including the back panel. Nothing stored under the table is visible from any angle.

Weight

Roughly 2 to 4 lbs depending on table size.

Light enough to carry in a tote bag or event kit alongside other booth materials.
