

Product Specification Sheet

Fitted Round Table Covers

Fitted Round Table Covers run on 600D PU polyester with contoured circular panels sewn to follow the exact curve of your round table. They're built for corporate events, formal galas, and trade show cocktail tables where a structured circular drape needs to hold its shape from setup to breakdown.

Material

600D PU Polyester.

The 600D denier rating (a measure of thread thickness) means a sturdy, wrinkle-resistant fabric that holds its contoured shape through repeated folding and washing.

Print Method

Dye sublimation at 300 DPI.

Ink converts to a gas under heat and bonds into the polyester fibers, so graphics won't crack or peel.

Color Output

Full color, CMYK range.

Any color in your logo prints accurately with no spot-color limitations.

Finishing

Hemmed edges with contoured circular panels.

The fitted construction holds fabric flat against the table base without bunching at the hem or pooling at the floor.

Size Range

Fits standard round folding tables by diameter.

Measure your table's diameter at the widest point before ordering. Each cover is tailored to one specific size.

Indoor/Outdoor Rating

Indoor use and light outdoor use. Colors are rated for roughly 6 to 12 months in typical indoor event conditions. Avoid prolonged direct sun or heavy rain without shelter.

Coverage

360-degree circular coverage from tabletop edge to floor, roughly 29 in of drop on a standard round folding table.

Weight

Approximately 2 to 4 lbs depending on table diameter. Light enough to fold flat and carry in a tote bag between events.
