

Product Specification Sheet

3-Sided Table Covers With Open Back

3-Sided Table Covers With Open Back run on 8.8 oz tension fabric and cover the front panel and both side panels with full-color dye sublimation printing. The back stays fully open. These covers suit any staffed table where storage access matters and the back faces a wall.

Material

8.8 oz tension fabric (woven polyester, heavier than a standard tablecloth). Machine washable cold, tumble dry low. Resists bunching during a full event day.

Print Method

Dye sublimation at 300 DPI. Ink bonds into fabric fibers permanently and does not crack, peel, or fade with washing.

Color Output

CMYK full color across all 3 printed panels. Text stays readable and logos stay sharp from across a 10 ft booth aisle.

Finishing

Hemmed edges on all panels prevent fraying after repeated washing and folding. Fitted corners keep the cover seated without shifting.

Size Range

Available for standard 4 ft, 6 ft, and 8 ft rectangular folding tables. Select your table length at checkout.

Indoor/Outdoor Rating

Suited for indoor use and light outdoor use with shelter overhead. Colors hold through 50 or more washes. Lifespan runs roughly 2 to 4 years with regular use and proper care.

Coverage

Front panel and both side panels drape to the floor. Back is fully open for staff seating and under-table storage access.

Weight

Roughly 2 to 4 lbs depending on table size. Folds flat and fits inside a tote bag for easy transport between events.
