

Product Specification Sheet

4-Sided Table Covers

4-Sided Table Covers run on 8.8 oz tension fabric, a smooth woven polyester that drapes flat to the floor on all four sides. This is the cover built for center-room tables where every angle faces an attendee. Here's the thing: the fabric weight, the print method, and the size options all work together to give you a fully enclosed setup that travels light and sets up fast.

Material

8.8 oz tension fabric (smooth, medium-weight woven polyester). Hangs flat to the floor without bunching. Machine washable cold, tumble dry low.

Print Method

Dye sublimation, where ink converts to a gas under heat and bonds permanently into the fabric fibers. The print cannot crack, peel, or wash off.

Color Output

CMYK full-color at 300 DPI across all covered panels. CMYK (cyan, magenta, yellow, black) reproduces any logo color or photographic graphic accurately.

Finishing

Hemmed edges on all panels for a clean border. Fitted corners hold the cover in place on the table.

Size Range

Available for standard 4 ft, 6 ft, and 8 ft rectangular folding tables. Each cover is cut to fit that specific table length.

Indoor/Outdoor Rating

Suited for indoor use and light outdoor use such as shaded vendor booths. Not rated for heavy rain or sustained wind without shelter overhead.

Coverage Style

Open-back style (front and two side panels plus open rear) or closed-back style (all four sides fully enclosed). Select at checkout.

Weight

Roughly 2 to 4 lbs depending on table size. Folds flat into a carry bag for transport between events.
