

Product Specification Sheet

Round Table Covers

Round Table Covers are circular-drape covers made from 600D PU polyester, printed full-color with dye sublimation. They fit standard round folding tables, including cocktail highboy rounds and banquet rounds, dropping to the floor on all 360 degrees. Best for cocktail events, reception areas, and round registration tables where branded coverage needs to wrap the full circumference.

Material

600D PU polyester.

The 600D denier rating means thicker threads, so the fabric resists tearing and holds its shape through repeated use.

Print Method

Dye sublimation at 300 DPI.

Ink bonds permanently into the fibers, so the print cannot crack, peel, or wash off the surface.

Color Output

Full color across the entire visible surface.

No limit on colors. Gradients and photographic images print as cleanly as flat logo graphics.

Finishing

Hemmed edges on all panels.

Hemming (a folded and stitched border) keeps the base from fraying and gives the drape a clean, finished edge.

Size Range

Sized by table diameter to fit standard round folding tables.

Cocktail highboy rounds and standard banquet rounds are the two most common fits.

Indoor/Outdoor Rating

Indoor use and light outdoor use.

For outdoor events, keep the table under a canopy tent to protect the fabric from direct rain.

Coverage

Full 360-degree circular drape to the floor.

The cover wraps the entire circumference with no open panels or exposed sides.

Weight

Roughly 2 to 4 lbs depending on table diameter.

Lightweight enough to fold flat and pack in a standard tote between events.
