

Product Specification Sheet

Stretch 3-Sided Table Covers With Open Back

Stretch 3-Sided Table Covers With Open Back wrap a standard 6 ft or 8 ft folding table in 8.8 oz spandex-blend polyester. The front and both side panels are covered while the back stays open for staff access. Full-color dye sublimation bonds ink into the fabric fibers for bold, crack-free graphics that hold up through repeated use.

Material

8.8 oz spandex-blend polyester with 4-way stretch.

The elastic grip holds the cover skin-tight against the table edges without clips or ties.

Print Method

Dye sublimation at 300 DPI across all printed panels.

Ink bonds into the fibers, so graphics cannot crack, peel, or lift from folding.

Color Output

Full color across front and both side panels.

Text stays readable and logos stay sharp from roughly 10 ft away across a trade show aisle.

Finishing

Hemmed edges on all panels. Fitted corners hold spandex taut at each table leg.

No raw edges, no fraying after repeated washing.

Size Range

Fits standard 6 ft or 8 ft collapsible folding tables. Select your table length at checkout.

Spandex requires an exact size match. Zero size forgiveness.

Indoor/Outdoor Rating

Suited for indoor use and light outdoor use in calm, dry conditions.

Machine washable cold. Colors rated for 50 or more washes without noticeable fading.

Coverage

Front and both side panels covered. Back left fully open for staff access.

Meets CPAI-84 flame retardancy standard required by most convention centers.

Weight

Roughly 2 to 4 lbs depending on table size. Drop length is approximately 29 in from table edge to floor.

Folds compactly for transport, typically smaller than a standard polyester cover.
