

Product Specification Sheet

Stretch 4-Sided Table Covers

Stretch 4-Sided Table Covers run on 8.8 oz spandex-blend polyester with four-way stretch and full-color dye sublimation across every panel. This is the tightest, most modern fit type in our table cover lineup, built for center-room tables where all four sides face an audience. Select your size carefully: the spandex requires an exact match.

Material

8.8 oz spandex-blend polyester with four-way stretch.

The elastic fabric pulls skin-tight around the table and holds its shape without bunching or shifting.

Print Method

Dye sublimation ink bonds directly into the fabric fibers under heat.

Graphics cannot crack, peel, or fade from folding because they live inside the fiber.

Color Output

Full-color all-over print across every panel.

Colors stay bold and readable from roughly 10 ft away across a booth aisle.

Finishing

Hemmed edges on all panels. Elastic grip along the base.

The grip tucks under the table legs and anchors the cover in place all day.

Size Range

Fits standard 6 ft or 8 ft collapsible folding tables.

Select your table length at checkout. The spandex requires an exact size match.

Indoor/Outdoor Rating

Suited for indoor use and light outdoor use in calm conditions.

Machine washable cold. Colors rated for 50 or more washes without noticeable fading.

Coverage

4-sided fully enclosed. All four sides and the top panel are covered.

Everything stored under the table stays hidden from every viewing angle.

Weight

Roughly 2 to 4 lbs depending on table size.

Folds compactly for transport and fits easily into a standard carry bag.
