

Product Specification Sheet

Stretch Cross Over Table Covers

Stretch Cross Over Table Covers use 180g spandex-blend polyester cut into an X-pattern sash that crosses the table top and leaves portions of the surface exposed. The elastic fabric pulls skin-tight across any 4 ft, 6 ft, or 8 ft standard folding table. This is the only cover style in our catalog that combines branded fabric straps with an open, usable table surface.

Material

180g spandex-blend polyester with 4-way stretch.

The elastic fabric grips the table frame and anchors under the legs without clips or ties.

Print Method

Dye sublimation at 300 DPI, bonded directly into the fabric fibers.

Ink won't crack, peel, or fade after machine washing.

Color Output

Full color across all printable strap panels.

Text stays readable and logos stay bold from roughly 10 ft away.

Finishing

Hemmed edges on all strap panels. Elastic grip holds the cover anchored under the table legs.

No clips, ties, or additional hardware needed.

Size Range

Fits 4 ft, 6 ft, and 8 ft standard folding tables. Round table sizing also available.

Stretch fabric requires an exact table size match with zero forgiveness for size variation.

Indoor/Outdoor Rating

Suited for indoor use and light outdoor use in dry, low-wind conditions.

Not rated for heavy rain or sustained outdoor wind without shelter overhead.

Single/Double-Sided

Printable area covers the fabric straps only. The exposed table surface between the straps is not printed.

Design must work on narrower strap panels.

Weight

Roughly 2 to 4 lbs depending on table size.

Folds compactly for transport and storage.
