

Product Specification Sheet

Stretch Round Table Covers

Stretch Round Table Covers are spandex-blend polyester covers built for standard round folding tables, pulling skin-tight from the top surface down to the floor. Full-color dye sublimation at 300 DPI embeds your graphics directly into the fabric. These covers work best on cocktail highboy tables at trade shows and modern corporate events where a smooth, column-like branded presence matters.

Material

Spandex-blend polyester with 4-way stretch.

The elastic fabric pulls tight around the round table shape, creating a smooth, wrinkle-free surface from top to floor with no excess fabric at the base.

Print Method

Dye sublimation at 300 DPI.

Ink converts to a gas under heat and bonds into the fabric fibers, so graphics don't crack, peel, or fade after repeated washing.

Color Output

Full color across the entire printable surface. No color limits, and gradients, photos, and fine text all reproduce clearly at 300 DPI.

Finishing

Elastic hem at the base grips under the table.

No ties, clips, or separate fasteners needed to hold the cover in place.

Size Range

Fits standard round folding tables.

Measure your table diameter at the widest point before ordering. The spandex has zero size forgiveness.

Indoor/Outdoor Rating

Indoor use and light outdoor use in dry conditions. Colors are rated for 50 or more machine washes without noticeable fading.

Single/Double-Sided

Single-sided print.

The outer face carries your full-color graphics. The inner face contacts the table surface.

Weight

Roughly 1 to 2 lbs depending on table diameter.

Folds compactly for transport and storage between events.
