

# Product Specification Sheet

## Custom Table Runners

Custom Table Runners are narrow polyester fabric strips printed by dye sublimation, sized to match 4 ft, 6 ft, or 8 ft rectangular tables. They're the only accent-layer product in the table covers catalog, built to lay centered on any table or base cover with roughly 12 to 18 in of drape per side.

### Material

600D PU Polyester.

Wrinkle-resistant, machine washable, and light enough to fold flat into a carry bag between events.

### Print Method

Dye sublimation at 300 DPI.

Ink bonds permanently into the fibers, so graphics won't crack, peel, or fade through repeated washing.

### Color Output

Full color across the entire runner surface, front drape, table top, and back drape.

No color limits or spot-color restrictions on any print zone.

### Finishing

Hemmed edges on all sides.

Balanced drape of roughly 12 to 18 in per side keeps the runner centered and flat.

### Size Range

4 ft, 6 ft, and 8 ft lengths. Width runs 24 to 30 in.

Covers the center portion of the table top on standard folding tables.

### Indoor/Outdoor Rating

Indoor use and light outdoor use with a base cover. Colors rated for 50 or more washes without noticeable fading.

Not rated for sustained outdoor exposure without shelter.

### Single/Double-Sided

Single-sided printing standard.

Front drape and table top are the primary print zones. Back drape prints full color as part of the single-sided run.

### Weight

Roughly 0.5 to 1 lb depending on table length.

Lightest product in the table covers catalog. Ships folded flat in a poly bag.
